

*We would like to thank the participation and high degree of interest on the companies that attended the 7th of May to the VII Technical Conference of Flexography -organized by ATEF and with the collaboration of AIMPLAS- in the QUIMOVIL Report **"REQUIREMENTS OF INKS IN PRODUCTION OF COMPOSTABLE PACKAGING"** by Ana García, Responsible R & D Flexible Packaging Inks.*

The paper dealt with the latest challenges posed by the European Union in relation to plastic packaging for 2030 as well as the concepts of biodegradability, compostability, recyclability, bioplastics .., and Standard 13432 on the requirements of valueable packaging through composting and biodegradation.

A topic of the most relevant in the new technologies and trends in Flexography that QUIMOVIL wanted to share as a specialized company.

We keep innovating!
